Appendix B Electronic Reports, by Report Number	43

Introduction

The Electronic Data Transmission System provides data files containing information currently appearing on hard copy reports. This document provides information for those reports selected by the Federal Retirement Thrift Investment Board to be included in the Electronic Transmission System.

Each report has a specification sheet. The sheet contains the report number, report name, a description of the report, and a record format. The record format section assigns a consecutive number to each data element. Each data element contains a starting and ending position, a data element description, a data type, and a data element size.

Behind the report specification sheet you will find a sample copy of the report. Two cross reference lists are provided to assist with the relationship between report number and report name. The physical report name in these lists was altered to reflect a report's function. This provides the ability to group reports having common functionality, e.g., Negative Adjustments. The names are modified so the first word(s) will group functions together. For example, Report Number 1802 has a report title of "Payroll Office Recap of Loan Journal Voucher Processing." Converting this into a function/descriptive format, the title will read "Payroll Office Recap of Loan JV Reporting." Reference the Electronic Reports list by Report Name.

A specification sheet and sample report(s) are furnished for each available report. They are in report number sequence by the first digit of each report number. All report numbers beginning with "1" will be in sequence together, no matter how many digits are in the number.

The agency file may contain data for multiple report numbers. Each record begins with nine (9) standard data elements – Payroll Office, Report Number/Report ID, Department, Agency, Personnel Office Identifier, Process Date, Journal Voucher Number, Journal Voucher Type, and Pay Date. These nine elements provide the receiving Payroll Office the ability to subdivide the data according to its requirements.

The reports in this document and the data file elements are provided through the Electronic Data Transmission System. New report IDs will be appended behind the last report ID in the document. The new Report ID/Record ID will be in sequence in the tables located in Appendix A - Electronic Report Data by Report Type/Name, and Appendix B - Electronic Report Data by Report Number/Report ID.

The most current version of the EDTS Guide is available at www.tsp.gov, Information for Agency/Service Representatives/Payroll Office Tools.

Electronic Data Transmission Specifications

The files being transmitted to the agency contain various record lengths. The file is a variable block file with a record length from 50 to 2,784 characters per record. These values do not represent current record lengths. They were selected to allow smaller or larger record lengths to be added in the future with minimal program changes. The actual record lengths and record formats are defined in this document. The DCB information used to create the transmission file is LRECL=2788, BLKSIZE=27844, and RECFM=VB.

Receiving locations must establish a dataset to receive the transmitted file. The file will have the same DCB attributes as above. It is recommended that a Generation Data Group (GDG) be used. A GDG of sufficient size provides a backup and prevents future transmissions from overwriting the previous transmission before it is processed.

Each record begins with nine (9) standard data elements – Payroll Office, Report Number/Report ID, Department, Agency, Personnel Office Identifier, Process Date, Journal Voucher Number, Journal Voucher Type, and Pay Date. These nine elements provide the receiving Payroll Office the ability to subdivide the data according to its requirements. The Journal Voucher Number and Journal Voucher Type fields will only contain data in reports that are journal voucher specific. Each journal voucher will be contained in a separate file. All non-journal voucher specific reports will be contained in a separate file. Within each Payroll Office Number and Journal Voucher Report Number, the data file records will be in report sequence (e.g., 1701, 1701, 1701, ...1702, 1703, etc.).

Data elements that are not used will contain default values. In the Data File Record Format table, alphanumeric fields coded X() in the Picture Clause column will contain spaces. Numeric fields coded 9() in the Picture Clause column will contain zeros.

All record formats may not appear on every transmission file; only those formats having activity that cycle will appear. For each Payroll Office, the record formats will be in sequence according to the first 8 fields as a minimum. Additionally, sequencing for reports with multiple records will be defined on the report specification sheet.

As new Report IDs are added, they will be added in sequence on the transmission file.

Security must be in place at the agency's location and the TSP Data Center before any transmissions are attempted. If Connect:Direct is used as the mode of transmission, the TSP must have the following information

1. Connect:Direct NODE Name, and IP Address
2. Permission to load data from RDC/TSPS Batch ACID to the agency,
3. SNODE ID and password,
4. GDG dataset name, and ensure ID has appropriate security options available to it and the dataset it will be using
5. Any other security or authority required at the agency's site, and
6. Start Job information, if the agency request TSPS to automatically start a process on your system upon successful completion of the transfer.
7. POC for the agency person(s) responsible for the transmission
8. Signed ISA agreement

Questions concerning the EDTS Guide and available methods of transmission should be addressed to the agency's payroll office point of contact at the TSP's Agency Technical Services office.

1.1 Payroll Office Recap of Journal Voucher Processing 1702

This report is used as a control over the contributions JVs that have been submitted to the TSP. It reflects employee data and well as traditional and Roth contributions (payment and negative adjustment records) that have been posted or rejected. This report also reflects breakage on makeup or late contributions and negative adjustment amounts that cannot be returned to the payroll office because of investment losses or length of time in the plan.

Total Number of Records	43		1		0	42

I certify that your participants' accounts in the TSP have been credited with the amount designated "Grand Total Charged". This amount was reduced by the negative adjustments credited and includes breakage associated with posting late or makeup contributions.

1.2 Error Report

1701

This report identifies records that were not processed and records that were processed but appear suspect. Error codes beginning with “R” identify rejected records that were not processed; error codes beginning with “W” identify warnings about suspect data, error codes beginning with “P” identify partially processed records. If there are no rejected transactions or transactions with warnings, you will not receive any 1701 data records on the file.

NOTE: All records will reflect the data as submitted by the payroll office. If a data element is missing, please refer to the error codes to determine whether or not it was required

1.2.1 Frequency Daily (if any submitted record had a warning or was rejected)

1.4 Summary Report of Negative Adjustments Processed 31504

This report shows the total amount of negative adjustments returned to the payroll office and a summary of each negative adjustment record processed. (It does not show the amount of money removed from participants' accounts because it does not show the positive earnings attributable to agency contributions that have been forfeited from accounts.)

Note: The amounts shown on the reports are positive; the amounts on the electronic data file are negative.

1.11 Header/Trailer Error Report (Optional) 1700

This report identifies all header/trailer records that contained errors and/or records which were not identifiable. If no header/trailer records contained errors and no unidentifiable records were detected, you will not receive this report.

NOTE: All records will reflect the data as submitted by the payroll office. If a data element is missing, please refer to the error codes to determine whether or not it was required.

NOTE: For all header/trailer records which do not have a unique ID, please use the Journal Voucher Type field to identify the record. For example, if the Header/Trailer Identification specifies "TR", the Trailer ID specifies "TRLR" and the Journal Voucher Type specifies "2-D," then you are looking at the Redesignation Trailer Record (TSP 2-D Trailer Record).

NOTE: If a 1700 record does not contain a header/trailer identifier as specified in item 9, the header or trailer record contained a record type (in positions 49-50) which is not recognized by the current TSP System.

1.12 SF-224 Abstract (Payroll Office Detail Report)

1603

This report provides agency and service payroll offices an accounting of the charges and credits made by the Thrift Savings Plan to their Treasury clearing accounts. By providing the journal voucher number, the clearing account, and the dollar amount associated with the processing of the journal voucher, the agencies and services can reconcile with the FMS-6653, Undisbursed Appropriation Account Ledger, provided by the Department of the Treasury.

1.12.1 Frequency As Required

1.12.2 Data File Record Format

Element Number	Start Pos.	End Pos.	Size	Data Element Name	Picture Clause	Value or Other Information
1	1	8	8	Payroll Office	9(08)	
2	9	20	12	Report Number/Record ID	X(12)	1603
3	21	28	8	Filler	X(08)	
4	29	36	8	Process date	9(08)	YYYYMMDD

6	49	56	8	Filler	9(08)	Zeroes
7	57	64	8	Opening date	9(08)	YYYYMMDD Beginning date of Report month
8	65	72	8	Closing date	9(08)	YYYYMMDD Ending date of Report month
9	73	80	8	JV process date	9(08)	YYYYMMDD Date JV was processed
10	81	86	6	JV number or TOTAL	X(06)	See Note 2
11	87	101	15	TSP Clearing Account	X(15)	Treasury Symbol
12	102	116	15	Amount	X(15)	See Note 3

Notes:

The file is made up of multiple detail records and one final “TOTAL” record. Both types of records will be 116 positions long and both will have all 12 data elements.

In detail records, element 10 will contain a JV Number. In the “TOTAL” record, this element will contain the word “TOTAL” in capital letters. “TOTAL” records will not have a value in element 9.

The format of this field contains a leading sign; the decimal is displayed, it is not a packed decimal. (Because of the source of this report, this format is different from that used for the other EDTS files.)

In cases where the field values do not fill them, the fields are right-justified.

TOTAL			741,992.45

1.13 EDTS Trailer Record (Optional)

99999

The EDTS trailer record is added to the EDTS transmission file upon request. It identifies the total record count (not including the trailer record itself).

1.13.1 Frequency Daily

1.13.2 Data File Record Format

Element Number	Start Pos.	End Pos.	Size	Data Element Name	Picture Clause	Value or Other Information
1	1	8	8	Payroll Office	9(08)	
2	9	20	12	Report Number/Record ID	X(12)	99999
3	21	28	8	Filler	X(08)	
4	29	36	8	Process date	9(08)	YYYYMMDD
5	37	48	12	Filler	X(12)	
6	49	56	8	Filler	9(08)	Zeroes
7	57	64	8	Record Count	9(08)	Exclusive of trailer
8	65	66	2	Filler	X(02)	
9	67	72	6	Reserved for Future Use	X(06)	

Appendix A - Electronic Reports, by Report Type/Name

Report Number	Report Name	Paragraph
5014	Breakage, Summary	1.5
1902	Earnings Adjustment, Payroll Office Recap	1.8
1603	FMS-224 Abstract Data Report	1.12
1701	Journal Voucher, Error Report	1.2
99999	EDTS Transmission File Trailer Record	1.13
1700	Journal Voucher, Header/Trailer Error Report	1.11
1703	Journal Voucher, Management Error Recap	1.3
1702	Journal Voucher, Payroll Office Recap	1.1
19401	Loan, Status	1.7
1802	Loan, Payroll Office Recap	1.6
31504	Negative Adjustments, Processed	1.4
35004	Redesignations, Payroll Office Recap	1.9
35005	Redesignation Error Report	1.10

Appendix B - Electronic Reports, by Report Number

Report Number	Report Name	Paragraph
1603	FMS-224 Abstract Data Report	1.12
1700	Journal Voucher, Header/Trailer Error Report	1.11
1701	Journal Voucher, Error Report	1.2
1702	Journal Voucher, Payroll Office Recap	1.1
1703	Journal Voucher, Management Error Recap	1.3
1802	Loan, Payroll Office Recap	1.6
1902	Earnings Adjustment, Payroll Office Recap	1.8
5014	Breakage, Summary	1.5
19401	Loan, Status	1.7
31504	Negative Adjustments, Processed	1.4
35004	Redesignations, Payroll Office Recap	1.9
35005	Redesignation Error Report	1.10
99999	EDTS Transmission File Trailer Record	1.13
